

Seang Darong

Web Developer

About Me

I am a reliable and capable Web Application Developer with experience in building responsive and interactive applications. I have worked on designing and integrating both frontend and backend systems using TypeScript, Flutter, Express.js, and PostgreSQL. I am a hardworking communicator with an enthusiastic attitude who focuses on clean code, usability, and high-quality performance in every project.

Education

Cambodia Academy of Digital
Technology (CADT)

Bachelor of Computer Science
Specialization in Software Engineering

Feb 2024 - Present

Skills

Technical Skills

- Languages:
 - TypeScript ●●●●●
 - JavaScript ●●●●●
 - SQL ●●●●●
 - Dart ●●●●●
 - Java ●●●●●
 - HTML, CSS ●●●●●
- Backend: Express.js, Node.js
- Frontend: React.js, Flutter
- Database: PostgreSQL
- Tools: Git, REST APIs, Postman, Figma

Soft Skills

- Collaboration: Supporting and motivating teammates.
- Communication: Clearly explaining system logic.

Experience

Backend lead - School Project

Bay Canteen - Meal voting system

August 2025

- Built a RESTful API using Node.js, Express, and Typescript.
- Optimized and design database relational schema to handle user concurrent user votes.
- Implemented Cloudflare R2 for efficient image storing and retrieval.
- Handling merge/Pull Requests and version control using git and github.

Database Design Teacher - Volunteer

NextGen- Program

August 2025

- Course preparation covering basic database, SQL, Entity Relationship diagram.
- Instructed students on how to design and give the example on real world problem.

Flutter Mobile App Development - School Project

CVDSim - Color blind simulator

January 2026

- Translated Figma prototypes into functional code with a focus on responsive UI and user accessibility.
- Build a mobile application using Flutter, focusing on scalable architecture and clean code.
- Defined technical requirements and project scope.

Frontend Developer - School Project

Cambodia Academy of Digital Technology (CADT)

2025-Present

- UX and UI design and prototyping
- Develop frontend using flutter following the design
- Collaborating with team using Figma.
- Integrating frontend components with backend services to ensure real-time data synchronization.

Language

- Khmer: Native language
- English: CEFR B2
